

A selective combination preemergence herbicide for the control of grass and broadleaf weeds in established turfgrasses (excluding golf course putting greens), lawns and ornamentals, conifer and hardwood seedling nurseries, non-crop areas including rights-of way for transportation systems and utilities (including roadways, roadsides, railways and equipment yards), facilities including substations, tank farms, pumping stations, parking and storage areas, and ungrazed fence rows, and Christmas tree farms.

<b>ACTIVE INGREDIENTS:</b>	% BY WT
Prodiamine*	23.3%
Isoxaben**	
OTHER INGREDIENTS:	61.2%
*CAS No. 29091-21-2	TOTAL: 100.0%
**CAS No. 82558-50-7	

Contains 2.2 pounds prodiamine per gallon and 1.5 pounds isoxaben per gallon.

# CAUTION

EPA Reg. No. 53883-325-58185 EPA Est. 37429-GA-001<sup>BT</sup>; 37429-GA-002<sup>BO</sup>

Letter(s) in lot number correspond(s) to superscript in EPA Est. No.

### **FIRST AID**

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious or convulsing person.

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-888-241-6409 for emergency medical treatment information.

#### This specimen label is for information only.

Everris makes no representations as to the accuracy of this label. It is the responsibility of the user to read and follow the label attached to the pesticide product container.

Net Contents: 2.5 gal (9.46 L)

Stock # **E95224** 

Net Contents: .5 gal (1.892 L)

Stock # **E95450** 

# PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

May be harmful if swallowed, absorbed through skin or inhaled. Avoid breathing vapor. Avoid contact with skin, eyes, or clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

# **PERSONAL PROTECTIVE EQUIPMENT (PPE)**

#### **WPS USES**

Applicators, mixers, loaders, and other handlers who handle this pesticide for any use covered by the Worker Protection Standard (40 CFR Part 170) - agricultural plant uses are covered - must wear:

- Long-sleeved shirt and long pants
- Chemical Resistant gloves
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

# **ENGINEERING CONTROLS STATEMENTS**

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

**IMPORTANT:** When reduced PPE is worn because a closed system is being used, handlers must be provided with all of the PPE specified above for applicators and other handlers, and have such PPE immediately available for use in an emergency, such as a spill or equipment breakdown.

### **USER SAFETY RECOMMENDATIONS**

#### **Users should:**

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- After handling this product immediately remove PPE, wash yourself thoroughly and change into clean clothing.

# **ENVIRONMENTAL HAZARDS**

This product has low solubility in water. At the limit of solubility, this product is not toxic to fish. However, at concentrations substantially above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Drift may result in reduced germination or emergence of non-target plants adjacent to treated area. Do not contaminate water when disposing of equipment wash water.

### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

# **AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. Exception: If the product is soil-injected or soil-incorporated, the Worker Protection Standard, under certain circumstances, allows workers toenter the treated area if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coveralls
- Chemical-resistant gloves such as butyl rubber ≥ 14 mils, or natural rubber ≥ 14 mils, or neoprene rubber ≥ 14 mils, or nitrile rubber ≥ 14 mils
- Shoes plus socks

# **NON-AGRICULTURAL USE REQUIREMENTS**

The requirements of this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forest or nurseries.

Applicators and handlers should wear:

- Long-sleeved shirt
- Long pants
- Chemical-resistant gloves
- Shoes with socks
- Protective eyewear

Thoroughly wash face and hands with soap and water after exposure and before eating or smoking. Launder exposed clothing before reuse. Do not allow reentry to treated areas until sprays have dried.

### **PRODUCT INFORMATION**

#### **Formulation and Mode of Action**

Gemini 3.7 SC is a liquid herbicide containing the active ingredients, prodiamine, a member of the dinitroaniline family of herbicides which inhibits mitotic processes in plants, and isoxaben, which has a cellulose biosynthesis inhibitor (CBI) mode of action. The actives control susceptible weeds by preventing growth and development of newly germinated seeds. Each gallon contains 3.7 pounds active ingredient (2.2 pounds prodiamine per gallon plus 1.5 pounds isoxaben per gallon). Gemini 3.7 SC is used for pre-emergent control of grasses and broadleaf weeds. Weed control is most effective when Gemini 3.7 SC is activated by at least 0.5 inches of rainfall or irrigation.

# **Uses and Application**

Apply Gemini 3.7 SC for selective preemergence control of many grass and broadleaf weeds in the following areas:

- Established turfgrasses (excluding golf course putting greens)
- Lawns
- Container, field-grown and landscape ornamentals
- Conifer and hardwood seedling nurseries
- Non-crop areas including managed rights-of-way for transportation systems and utilities (such as roadways, roadsides, railways, and equipment yards)
- Non-crop facilities including substations, tank farms, pumping stations, parking and storage areas
- Non-grazed fence rows
- Christmas tree farms

Apply Gemini 3.7 SC in a minimum of 20 gallons/acre (0.5 gallons /1,000 sq ft) of carrier (water and/or liquid fertilizer) using a calibrated, low-pressure sprayer with 50-mesh or coarser screens. A broadcast boom or handheld wand designed for herbicide or insecticide application will provide the best results. Select nozzle pressure and flow rate to provide complete coverage.

# **New Plantings, Replanting and Rotational Plantings**

Rotate nursery, landscape or non-cropped land areas treated with Gemini 3. 7 SC only to ornamental species listed on this label for 1 (one) year following application unless the following test has shown species safety:

 Before planting a species not listed on this label, sow several test strips of an indicator plant such as wheat, sorghum or corn into the treated area. If the indicator plants germinate and grow normally to a height of 12 inches with normal root development, it is safe to plant. In areas disturbed by new plantings or replanting of labeled species, it may be necessary to retreat exposed soil to maintain satisfactory weed control, but do not apply more than 87 fl. oz. of product per acre per year.

## **MIXING GEMINI 3.7 SC**

#### When Used Alone

Mix Gemini 3.7 SC thoroughly in the spray tank to ensure uniform application. Steps to follow when mixing Gemini 3.7 SC include:

- 1. Filling the spray tank 1/4 full with clean water only;
- 2. Starting the agitation system and checking to ensure it is working properly;
- 3. Maintaining vigorous agitation in the spray tank before and during the application to ensure a well-mixed spray suspension;
- 4. Adding a spray colorant with Gemini 3.7 SC to mark treated areas and improve application accuracy by minimizing swath skips and overlaps; and
- 5. After use, thoroughly clean the sprayer by flushing the system with water containing a detergent.

Refer to the PESTICIDE DISPOSAL section of this label for waste disposal. Do not allow spray suspension to dry in the tank. If Gemini 3.7 SC was mixed with fertilizer instead of water in the spray tank, the fertilizer aids in re-suspension of Gemini 3.7 SC if agitation is disrupted. Use the entire tank before stopping agitation.

#### When Used in Tank Mixtures

Gemini 3.7 SC can be applied in tank-mixtures with certain other EPA-registered herbicides to provide a broader spectrum of weed control and/or to control emerged weeds. Refer to the specific directions for use for tank-mix partner(s), and refer to the label(s) of the individual tank-mix partner(s) for use rate, application timing, weeds controlled, and specific precautions and/or restrictions. Tank mixes are permitted only in states where the tank-mix partner(s) are registered for the application site and the ornamental species listed. When using Gemini 3.7 SC in a tank mixture with other pesticides, follow restrictions and precautions on the labels of the products used.

When mixing Gemini 3.7 SC with other components (carrier and partner pesticide products), allow products to completely dissolve between steps and be sure to maintain agitation throughout mixing and application. Add other components to the spray tank in the following order:

- 1. Products packaged in water-soluble bags. Agitate the tank mixture. Allow the water-soluble bags to completely dissolve and the products to disperse before adding any other tank-mix partners.
- Water-dispersible granules (WDG or WG formulations) and wettable powders (WP formulations). Add wettable powders to the tank as agitation continues. Allow the product to disperse completely before other products are added.
- Spray adjuvants and spray markers. Read the adjuvant's label first and use only those adjuvants approved for application to turf and ornamentals.
- 4. Gemini 3.7 SC, other flowable liquids (FL) or suspension concentrates (SC) must be added next.
- 5. Add emulsifiable concentrates (EC) last.

#### **Compatibility Testing**

Before mixing Gemini 3.7 SC with other pesticides in the spray tank, test for compatibility by mixing all components (carrier and pesticide products) in an appropriate container in proportionate quantities. For example, 1 quart would be 1/100 the volume of a 25 gallons/acre spray rate. At 21 fl. oz./acre, the Gemini 3.7 SC rate would be approximately 1 teaspoon to a quart of water (see **Table 1**).

**Table 1:** Amount of tank mix component to add to one quart of spray carrier to test various tank mixes. Proportions are representative of a larger volume of 25 gallons/acre.

Component	Rate Per		Level Teaspoons	
Formulations	Acre 1,000 sq ft		Level leaspoolis	
Gemini 3.7 SC	21.0 fl. oz.	0.5 fl. oz.	1.0	
Dry Tank-Mix Partners	1.0 lb	0.4 oz	1.5	
Liquid Tank-Mix Partners	16 fl. oz.	0.4 fl. oz.	0.5	

If components do not ball-up or form flakes, sludge, gels, oily films, or layers, then the mixture is compatible. Let the mixture stand for 15 minutes. Incompatibility will usually occur within 5 minutes after mixing. If components are not compatible, use a compatibility agent and rerun the test to determine if the mixture is suitable. If the components are still not compatible, do not tank mix.

Follow all applicable directions, restrictions, and precautions on the labels of EPA-registered tank-mix partners.

#### PRODUCT USE RESTRICTIONS

- Do not graze or feed livestock forage cut from areas treated with Gemini 3.7 SC.
- Do not apply Gemini 3.7 SC to plants that will be consumed for food use.
- Do not blend Gemini 3.7 SC onto dry fertilizer or any other granular material.
- Do not apply to golf course putting greens.
- Do not exceed a dosage of 2.5 lbs. active ingredient/acre (87 fl.oz./ acre) (1.5 lbs. Prodiamine and 1.0 lb. Isoxaben) per year on any use site and do not repeat an application sooner than 60 days after a previous application.
- Chemigation: Do not apply this product through any type of irrigation system. Do not apply aerially.

#### **State Specific Restrictions:**

- The state of Arizona has not approved this product for use on agricultural commodities. If grown for commercial production, use on the following sites/crops is prohibited: container-grown field ornamentals, field-grown ornamentals, ornamental bulbs, and Christmas tree/conifer plantations.
- Ornamental bulbs grown for commercial production is restricted in California.
- Not for sale, use or distribution in the state of New York.

# Treatment of Turfgrass or Ornamental Species Not Listed on the Label for Gemini 3.7 SC:

Users who wish to use Gemini 3.7 SC are limited to non-food, ornamental plant species located strictly in labeled use sites. Although this label contains a large number of ornamental species, it is not possible to include all of the ornamental plants that may be encountered in a nursery or landscape setting. On a plant species not listed on this label the user may determine the suitability of such use by treating a small area or number of these plants at a specified rate. Prior to treatment of larger areas, the treated area or plants should be observed for any sign of herbicidal injury during the 30 to 60 days of typical growing conditions.

#### Gemini 3.7 SC use rates and A.I. load simplified:

- 1 fl. oz. per 1,000 sq.ft. or 43.5 fl. oz. per acre is equivalent to 0.75 lb. of Prodiamine and 0.5 lb. of Isoxaben per acre.
- 2.0 fl. oz. per 1,000 sq.ft. or 87 fl. oz. per acre is equivalent to 1.5 lbs. of Prodiamine and 1.0 lb. of Isoxaben per acre.

# WEEDS CONTROLLED OR SUPPRESSED IN ESTABLISHED TURF AND ORNAMENTALS

When used as directed in this label for established turf and container, field grown and landscape ornamental plantings including Christmas tree farms, Gemini 3.7 SC will control or suppress the grass and broadleaf weeds listed in **Table 2**.

Not for use in California
 Controlled at the indicated rate. To control this weed, apply Gemini 3.7 SC in late summer, fall, or winter before weeds germinate.
 Suppression only at the indicated rate.
 In many areas a single application of 43.5-87.0 fl.oz./acre of Gemini 3.7 SC will control goosegrass. However, under heavy goosegrass pressure and/or an extended growing season, weed control will be most effective by making an initial application of 43.5 fl.oz./acre followed by a second application 60-90 days later.

#### **SPECIFIC USE DIRECTIONS - ESTABLISHED TURF**

#### **Product Information**

Gemini 3.7 SC is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turfgrasses including golf courses (excluding putting greens), lawns and sod nurseries. The maximum amount of Gemini 3.7 SC that can be applied per year is given for each turfgrass species in **Table 4** of this label.

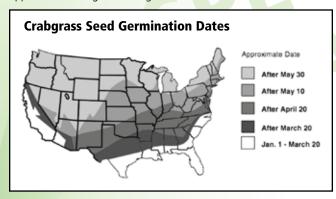

# **USE RESTRICTIONS** - Turfgrass: Golf Courses (excluding golf course putting greens), Lawns, and Sod Nurseries

- Do not apply Gemini 3.7 SC to areas where dichondra, colonial bentgrass, velvet bentgrass or annual bluegrass (*Poa annua*) are desirable species.
- Do not cut (harvest) treated sod before 90 days after application. To avoid turfgrass injury, do not apply to newly set sod until the sod has rooted and exposed edges have filled in.
- Do not apply Gemini 3.7 SC to golf course putting greens.
- Do not apply Gemini 3.7 SC to turfgrass grown for seed.
- Do not apply Gemini 3.7 SC to turf stressed by conditions such as drought, low fertility, or pest damage.

# USE PRECAUTIONS - Turfgrass: Golf Courses (excluding golf course putting greens), Lawns, and Sod Nurseries

- Disturbing the herbicide barrier with cultural practices such as disking can result in reduced weed control.
- If the depth of the creeping bentgrass root system becomes shallow and root tips contact prodiamine-treated soil, new root formation can be inhibited. Mowing height can affect the depth of a plant's root system. To avoid this do not apply Gemini 3.7 SC to creeping bentgrass less than 0.5 inches in height.

For optimum weed control, activate Gemini 3.7 SC with at least 0.5 inches of rainfall or irrigation before weed seeds germinate and within 14 days following application. See the map below for approximate crabgrass seed germination dates.

### **Timing and Method of Application to Turfgrass**

Apply Gemini 3.7 SC as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made before target weeds germinate because Gemini 3.7 SC will not control weeds that have already emerged. Apply Gemini 3.7 SC in a minimum of 20 gallons/acre (0.5 gallons/1,000 sq ft) of carrier (water and/or fluid fertilizer) using a calibrated, low-pressure sprayer with 50-mesh or coarser screens. A broadcast boom or handheld wand designed for herbicide or insecticide application will provide the best results. Select nozzle pressure and gallonage to provide complete coverage.

The amount of Gemini 3.7 SC to apply depends upon the length of residual weed control desired (the higher the application rate, the longer the control), the turf species, and the maximum amount which can be applied to the turf species per calendar year. Specific information is provided in **Table 3** and **Table 4**.

# Table 3. Length of Crabgrass Control with Gemini 3.7 SC

**Note:** Length of control varies by region. This is an average:

0.5 fl. oz. per 1,000 sq.ft. or 21.75 fl. oz./acre - up to 3 months control of crabgrass.

0.75 fl. oz. per 1,000 sq.ft or 32.6 fl. oz./acre - up to 4 months control of crabgrass.

1.0 fl. oz. per 1,000 sq.ft or 43.5 fl.oz./acre - up to 6 months control of crabgrass.

1.3 fl. oz. per 1,000 sq.ft. or 56.5 fl. oz./acre- up to 8 months control of crabgrass.

### **Dosage**

Gemini 3.7 SC can be safely applied to the turfgrass species listed in Table 4. Do not exceed the highest rate listed for each species in a calendar year as injury can occur.

Table 4. Maximum Application Rate of Gemini 3.7 SC per Calendar Year by Turf Species

Turf Species	Fl. Oz. Product/ Acre <sup>1</sup>	Fl. Oz. Product/1,000 sq. ft!
Bermudagrass <sup>2</sup> , Bahiagrass, Centipedegrass, Kikuyugrass, Seashore Paspalum, St. Augustinegrass <sup>3</sup> , Tall Fescue (including turf-type), Zoysiagrass	38-87	0.87-2.0
Buffalograss, Kentucky Bluegrass, Perennial Ryegrass	18-54	0.41-1.2
Fine Fescue	18-43	0.41-1.0
Creeping Bentgrass (0.5 inch or more in height <sup>4</sup> )	18-38	0.41-0.87

<sup>1</sup> Gemini 3.7 SC can be applied more than once per year as long as the total amount applied is not greater than the maximum application rate for each turf species. All applications must be made before weed seeds germinate.

#### When to Apply Gemini 3.7 SC after Overseeding Turf

Injury to desirable seedlings is likely if Gemini 3.7 SC is applied before the secondary roots of seedlings are in the second inch of soil, not thatch plus soil. To reduce the potential to injure overseeded turf, wait 60 days after seeding or until after the second mowing, whichever is longer, before applying Gemini 3.7 SC.

# When to Overseed After Application - All States

Gemini 3.7 SC will inhibit the development of turfgrass species overseeded too soon after application. Follow rates and intervals in **Table 5** for best overseeding / reseeding results.

<sup>2</sup> Gemini 3.7 SC can be used on newly sprigged or plugged bermudagrass at rates not to exceed 30.7 fl. oz./acre (0.7 oz./1,000 sq ft). Newly sprigged or plugged bermudagrass stolon rooting can be temporarily inhibited.

<sup>3</sup> Use an initial rate of 29-58 fl. oz./acre per application.

<sup>4</sup> To avoid grass injury, do not apply Gemini 3.7 SC to creeping bentgrass mowed at less than 0.5 inch in height.

Table 5. Waiting Interval Before Overseeding Perennial Ryegrass Following Application of Gemini 3.7 SC

Amount of Gemini 3.7 SC	Interval (Months Before Overseeding)*		ths ling)*
FL. Oz. Product/Acre	North	Transition	South
29	4	4	4
38	5	4	4
43	6	5	5
47		6	6
56		7	7
65			9
76			10
87			12

<sup>\*</sup> In AZ, CA, NV, and TX the overseeding interval can be shorter in established bermudagrass that has been overseeded with perennial ryegrass. See the next section for additional information.

**Poa Annua Control in Established Bermudagrass Overseeded** with Perennial Ryegrass (AZ, CA, NV, and TX only): Use on golf courses (excluding golf course putting greens), lawns, and sod nurseries when overseeding with perennial ryegrass. (Minimum seeding rate of 350 lbs/acre.)

Table 6. Amount of Gemini 3.7 SC to Apply to Bermudagrass Overseeded with Perennial Ryegrass

Amount to Apply	When to Apply	Expected Control	Use Precautions
21.7-38 Fl.Oz./ acre*	6-8 weeks before ryegrass over- seeding Second appli- cation: 4-8 weeks after over- seeding or when perennial ryegrass roots are in the second inch of soil	1 application for 70% or greater control of Poa annua Second application can enhance control	<ul> <li>Some seedling mortality and temporary reduction in root growth of new seedlings can occur.</li> <li>To reduce the potential for seedling mortality, maintain a moist seedbed with light, frequent irrigation.</li> <li>Make no more than 2 applications per year for this use, and do not exceed a total of 48 fl. oz./acre (1.38 pounds active ingredient/acre) per year.</li> <li>Do not make a second application if any injury to the ryegrass is observed after the first application.</li> <li>Do not make a second application unless the product was first applied before overseeding.</li> </ul>

<sup>\*</sup> The amount of Gemini 3.7 SC to apply depends upon: the length of residual control desired (the higher the application rate, the longer the control).

Note: The higher the rate, the greater the potential for seedling mortality.

# CONTAINER, FIELD-GROWN AND LANDSCAPE OR-NAMENTAL PLANTINGS INCLUDING CHRISTMAS TREE FARMS

#### **Product Information**

Apply Gemini 3.7 SC to soil surfaces for preemergence and limited postemergence control of many grass and broadleaf weeds around ornamental shrubs and trees, established perennial vegetation and wildflower plantings and Christmas tree farms. See **Table 2** for a list of weeds controlled.

## USE RESTRICTIONS - Container, Field-grown and Landscape Ornamental Plantings, and Christmas Tree Farms

- Do not apply Gemini 3.7 SC to seedbeds, or seedling transplant beds. Only apply to established plantings.
- Do not apply to unrooted liners or cuttings that have been planted in pots for the first time.
- Do not apply to pots less than six inches wide.
- Do not apply to ground covers until they are established and well rooted.
- Do not apply to bedding plants or areas where bedding plants will be planted or transplanted within one year after application.
- Do not apply Gemini 3.7 SC to plants inside enclosed structures.
- Do not cover plants treated with Gemini 3.7 SC until 21 days have passed after application.
- Do not apply Gemini 3.7 SC to newly transplanted ornamentals, nursery stock, or ornamental bulbs. Delay application until soil has settled and roots have formed.
- Do not apply after emergence of ornamental bulbs.

# **USE PRECAUTIONS - Container, Field-grown and Landscape Ornamental Plantings, and Christmas Tree Farms**

- Disturbing the herbicide barrier with cultural practices such as disturbing containers, removal of emerged weeds, disking, harrowing and deep raking can result in reduced weed control.
- Applications of Gemini 3.7 SC over the top of plants with newly forming buds may cause injury. Possible plant injury may be avoided by application as a directed spray to the soil surface beneath ornamental plants.

#### **Timing and Method of Application**

Gemini 3.7 SC is primarily a preemergence herbicide and will not control most grass or broadleaf weeds post-germination. It works best when applied to soil that is free of clods, weeds and debris and is activated by at least 0.5 inches of irrigation or rainfall or shallow incorporation to a depth of 1 to 2 inches. Weed control is improved if Gemini 3.7 SC is activated in the soil before weed seeds germinate and within 14 days after application. Apply Gemini 3.7 SC to newly-transplanted and established ornamentals as an over-the-top spray.

# Postemergence Control of Yellow Woodsorrel (Oxalis) and Bittercress:

Gemini 3.7 SC will control or suppress Hairy Bittercress, *Cardamine hirsu-ta*, and Yellow Woodsorrel, *Oxalis stricta*, seedlings from germination up through the 1st true leaf stage. Postemergent seedling mortality reaches its maximum over a period of 7-28 days depending on local conditions. Warmer conditions typically result in faster results.

#### **Plant Sensitivity**

Direct application of Gemini 3.7 SC to rapidly growing tissue or buds can injure plants. In the spring when buds are rapidly growing and expanding, over-the-top application of Gemini 3.7 SC can injure new growth. However, these effects are temporary. To reduce the possibility of injury, wait to apply Gemini 3.7 SC over the top of newly emerged vegetation until it has hardened off, unless your experience indicates that the plant in question will not be injured by the over-the-top application. After application, immediately apply overhead irrigation to the foliage to rinse Gemini 3.7 SC from plant surfaces onto soil (wetting the foliage of plants before application can improve the rinsing process).

### Table 7. Amount of Gemini 3.7 SC to Apply to Container, Field Grown and Landscape Ornamental Plantings, and Christmas Tree Farms

Amount to Apply	When to Apply	Comments/Instructions
38 - 87 fl. oz./acre or 0.9 - 2.0 fl. oz./1,000 sq. ft.	In fall or spring before weeds germinate or after weeds are removed.	Use the higher amount for longer control.     Gemini 3.7 SC can be applied more than once per year as long as the total amount of product applied does not exceed 87 fl. oz./acre (2.5 lbs. active ingredient/acre) per year.

Table 8. Equivalent Measurements for Gemini 3.7 SC

Fl. Oz./acre	Fl. Oz./ 1,000 sq. ft.	Approximate Equivalent - Tablespoons/1,000 sq. ft.
38	0.9	1.75
43.5	1.0	2.0
87	2.0	4.0

Table 9. Application Sites and Instructions for Gemini 3.7 SC Use on Container, Field Grown and Landscape Ornamental Plantings, and Christmas Tree Farms

Site	Application Instructions
	•
Newly-Transplanted Container or Field Nursery Stock	<ul> <li>Do not apply until soil has settled around trans plants and roots have formed.</li> <li>Water transplants thoroughly before application.</li> <li>Apply after cuttings form roots and are established.</li> <li>Apply before budding/grafting, or after buds/grafts have taken, to avoid inhibition of the tissue union.</li> <li>Do not apply to pots less than six inches wide.</li> </ul>
Established Container, Field Nursery Stock, or Landscape Plants	<ul> <li>Apply at any time as an over-the-top, or directed spray.</li> </ul>
Landscape or Ornamental Plantings	<ul> <li>Apply as an over-the-top, or as a directed spray.</li> <li>Delay applications to newly transplanted ornamen tals until soil has settled around transplants.</li> </ul>
Bare Ground Application for Container Placement	<ul> <li>Apply to soil (including mulch, gravel, wood chips, or other permeable base) upon which containerized ornamentals are placed.</li> <li>After Gemini 3.7 SC is applied, perform shallow cultivation or hand weeding only, to avoid disturb ing the herbicide barrier.</li> </ul>
In Shadehouses and Uncovered Polyhouses	<ul> <li>After Gemini 3.7 SC is applied, houses must remain uncovered for at least 21 days. In addition, plants must receive 2 irrigations totaling at least 0.5 inches of water before covering.</li> </ul>
Ornamental Bulbs (grown for commercial production is prohibited in California and Arizona)	Gemini 3.7 SC can be applied to bulbs. Apply before bulbs emerge. Do not apply after emergence.

# Tank Mixtures for Use on Container, Field Grown and Landscape Ornamentals, and Christmas Tree Farms

Tank mix Gemini 3.7 SC with other registered herbicides listed on this label to provide a broader spectrum of weed control or to control emerged weeds. Tank mixes with Gemini 3.7 SC are for use only in states where the tank-mix partner(s), application site and intended use pattern are registered.

Follow the label directions of the tank-mix partner(s) for application rates, timing, weeds controlled, listed ornamentals, and specific use precautions and/or restrictions. Before combining a tank-mix partner in the spray tank, test for compatibility as described in the **Compatibility Testing** section of this label.

Table 10. Tank-Mix Partners for Gemini 3.7 SC Use on Container, Field Grown and Landscape
Ornamental Plantings and Christmas Tree Farms

Product	Precautions / Instructions
Galigan® 2E (use on conifers only)	Mix with Gemini 3.7 SC for postemergence control of certain broadleaf weeds including malva and filaree.
Princep®, MANA Parallel	See product labels for weed spectrum and listed ornamentals.
Glyphogan® (or other gly- phosate-based products) and Finale®	<ul> <li>These nonselective tank mix herbicides control many emerged annual broadleaves and grasses.</li> <li>Take extreme care to prevent tank mixtures with these partner products from contacting the foliage and stems of turfgrass, trees, shrubs, or other desirable vegetation because desirable vegetation could be severely injured or killed. Apply these tank mixtures as a directed spray and use a shield to prevent spray</li> </ul>
	<ul> <li>from contacting foliage of desirable plants.</li> <li>Following instructions on the tank-mix partner's label, delay irrigation of the treated area to allow time for the herbicide to be absorbed by weed foliage.</li> </ul>

#### **Ornamental Plant Sensitivity**

Gemini 3.7 SC will not likely harm the trees, shrubs, vines and flowers listed below in **Table 11**. Gemini 3.7 SC can be applied over the top of the listed species. The species that are sensitive to Gemini 3.7 SC when grown in containers are indicated.

When plants are under stress (such as heat, drought, or frost damage), some cultivars of listed plants may be sensitive to Gemini 3.7 SC.

Table 11. The Plants Listed in this Table are Not Likely to be Injured by Gemini 3.7 SC at any of the Listed Application Rates.

Leucophyllum laevigatum	Chihuahan Sage
Leucothoe axillaris	Coastal Doghobble
Leucothoe fontanesiana	Drooping Fetterbush
Ligustrum vulgare cv. Lodense	Common Privet 'Lodense'
Ligustrum amurense	Amur Privet
Ligustrum japonicum	Japanese Privet, Waxleaf Privet
Ligustrum japonicum cv. Texanum	Japanese Privet 'Texanum'
Ligustrum japonicum cv. Variegatum	Japanese Privet 'Variegatum'
Ligustrum lucidum	Glossy Privet
Ligustrum ovalifolium	California Privet
Ligustrum sinense†	Chinese Privet <sup>†</sup>
Ligustrum vulgare cv. Cheyenne	Ligustrum 'Cheyenne'
Limonium perezii	Sea Lavender, Status
Liquidambar styraciflua	American Sweetgum

Scientific name	Common name
Liriope gigantea	Giant Lily Turf
Liriope muscari cv. Big Blue	Liriope 'Big Blue', Lillyturf 'Big Blue'
Liriope muscari cv. Lilac Beauty	Liriope 'Lilac Beauty'
Liriope muscari cv. Majestic	Liriope 'Majestic'
Liriope muscari cv. Monroe White	Liriope 'Monroe White'
Liriope muscari cv. Silvery Sunproof	Liriope 'Silvery Sunproof'
Liriope muscari cv. Variegata	Liriope 'Variegata'
Liriope spicata cv. Silver Dragon	Liriope 'Silver Dragon'
Liriope spicata†	Creeping Lirope <sup>†</sup>
Lobelia cardinalis†	Cardinal Flower, Indian Pink <sup>†</sup>
Lonicera fragrantissima	Winter Honeysuckle
Lonicera periclymenum	Flowering Woodbine
Lonicera periclymenum cv. Serotina	Flowering Woodbine 'Serotina'
Lonicera sempervirens	Trumpet Honeysuckle
Lonicera tatarica	Tatarian Honeysuckle
Loropetalum chinense cv. Burgundy†	Loropetalum 'Burgundy'
Loropetalum chinense cv. Ruby†	Loropetalum 'Ruby'†
Loropetalum chinense cv. Sizzling Pink	Loropetalum 'Sizzling Pink'
Loropetalum chinense cv. Razzleberri	Loropetalum 'Razzleberri'
Lysimacia mummularia	Moneywort
Lysimacia punctata	Spotted Loosestrife
Magnolia grandiflora	Southern Magnolia
Magnolia x soulangeana	Saucer Magnolia
Magnolia stellata cv. Royal Star	Magnolia 'Royal Star'
Mahonia aquafolium	Oregon Grape
<i>Mahonia japonica</i> cv. Beali	Leather Leaf Mahonia 'Beali'
Mahonia repens	Creeping Mahonia
Malephora luteola	Ice Plant
Mandevilla splendens cv. Red Riding Hood	Mandevilla 'Red Riding Hood'
Matteuccia struthiopteris	Ostrich Fern
Michelia figo	Banana Shrub, Port Wine Magnolia
Miscanthus sinensis	Maiden Grass, Eulalia
Miscanthus sinensis cv. Silberfeder	Maiden Grass 'Silberfeder'
Miscanthus sinensis cv. Yaku Jima**†	Maiden Grass 'Yaku Jima'**†
Morus alba	White Mulberry
Musa acuminata*	Banana*
Myoporum parvifolium cv. Putah Creek	Creeping Myoporum 'Putah Creek'
Myrica cerifera	Southern Wax Myrtle
Myrica pennsylvanica	Northern Bayberry
Nandina domestica	Nandina
Oenothera missouriensis†	Ozark Sundrops, Evening Primrose†
Oenothera speciosa cv. Siskiyou	Evening Primrose 'Siskiyou'  Olive*
Olea europaeă*	Sensitive Fern
Onoclea sensibilis Ophiopogon japonicas cv. Nanus	Mondo Grass 'Nanus'
Ophiopogon japonicus**	Mondo Grass**
Origanum libanoticum	Hopflower
Osmanthus fragrans	Sweet Osmanthus
Osmanthus heterophyllus	Holly Osmanthus
osmandia neteropriyilas	Tion, Osmanaias

Scientific name	Common name
Osmanthus heterophyllus cv. Gulf Tide†	Holly Osmanthus 'Gulf Tide'
Osteospermum fruticosum†	Trailing African Daisy <sup>†</sup>
Oxydendrum arboreum	Sourwood
Pachysandra terminalis cv. Green Sheen	Japanese Spurge 'Green Sheen'
Paeonia suffruticosa†	Tree Peony <sup>†</sup>
Penstemon x gloxinoides	Penstemon 'Apple Blossom'
Phlox subulata	Moss Phlox
Phoenix roebelenii	Pygmy Date Palm
Phormium tenax	New Zealand Flax 'Jack Spratt'
Physocarpus opulifolius	Common Ninebark
Physostegia virginiana cv. Vivid†	Obedient Plant 'Vivid'†
Picea abies cv. Pendula	Weeping Norway Spruce
Picea abies cv. Elegans	Spreading Norway Spruce
Picea abies	Norway Spruce
Picea glauca	White Spruce
Picea glauca cv. Conica	Dwarf Alberta Spruce
Picea pungens	Colorado Blue Spruce
Picea pungens cv. Hoopsii	Hoop's Blue Spruce
Picea pungens cv. Kosteri	Blue Spruce 'Kosteri'
	Pieris, Japanese Andromeda
Pieris japonica Pieris japonica cv. Mountain of Fire	Pieris 'Mountain of Fire'
	Pieris 'Snowdrift'
Pieris japonica cv. Snowdrift	
Pieris japonica cv. Temple Bells	Pieris 'Temple Bells'
Pieris japonica cv. Valley Rose	Pieris 'Valley Rose'
Pieris japonica cv. Valley Valentine	Pieris 'Valley Valentine'
Pinus mugo	Mugo Pine
Pinus aristata	Bristlecone Pine
Pinus canariensis	Canary Island Pine
Pinus contorta	Shore Pine, Lodgepole Pine
Pinus eldarica	Eldarica Pine
Pinus elliottii	Slash Pine
Pinus halepensis	Aleppo Pine
Pinus leucodermis	Bosnian Pine
Pinus nigra	Black Pine
Pinus palustris	Longleaf Pine
Pinus radiata	Monterey Pine
Pinus strobus	Eastern White Pine
Pinus sylvestris	Scotch Pine
Pinus sylvestris cv. Fastigiata	Scotch Pine 'Fastigiata'
Pinus taeda	Loblolly Pine
Pinus thunbergii	Japanese Black Pine
Pinus virginiana	Virginia Pine
Pittosporum rhombifolium	Queensland Pittosporum
Pittosporum tenuifolium cv. Golf Ball	Kohuhu 'Golf Ball'
Pittosporum tobira	Japanese Pittosporum
Pittosporum tobira cv. Wheeler's Dwarf	Japanese Pittosporum 'Wheeler's Dwarf'
Platanus occidentalis	Sycamore
Platanus racemosa	California Sycamore
Plumbago auriculata	Plumbago

Scientific name	Common name
Podocarpus macrophyllus	Buddhist Pine, Yew Podocarpus
Polygala fruticosa	Sweet Pea Shrub
Polystichum acrostichoides	Christmas Fern
Polystichum polyblepharum	Tassel Fern
Populus deltoides	Eastern Cottonwood
Potentilla fragiformis	Strawberry Cinquefoil
Potentilla fruticosa	Shrubby Cinquefoil
Potentilla fruticosa cv. Floppy Disc	Cinquefoil 'Floppy Disc'
Potentilla fruticosa cv. Gold Drop	Cinquefoil 'Gold Drop'
Potentilla fruticosa cv. Goldfinger	Cinquefoil 'Goldfinger'
Potentilla fruticosa cv. Red Ace	Cinquefoil 'Red Ace'
Potentilla fruticosa cv. Sunset	Cinquefoil 'Sunset'
Potentilla fruticosa cv. Tangerine	Cinquefoil 'Tangerine'
Potentilla verna	Spring Cinquefoil
Prosopis chilensis	Chilean Mesquite
Prunus laurocerasus	Cherry Laurel, English Laurel
Prunus laurocerasus cv. Otto Luyken	Cherry Laurel 'Otto Luyken'
Prunus caroliniana	Carolina Cherry Laurel
Prunus caroliniana cv. Bright 'n Tight	Carolina Cherry Laurel 'Bright 'n Tight'
Prunus glandulosa	Dwarf Flowering Almond
Prunus x yedoensis	Yoshino Cherry
Pseudotsuga menziesii**	Douglas Fir**
Psidium cattleianum	Strawberry Guava
Pyracantha coccinea	Scarlet Firethorn
Pyracantha coccinea cv. Lalandei	Scarlet Firethorn 'Lalandei'
Pyracantha fortuneana	Pyracantha, Chinese Firethorn
Pyracantha fortuneana cv. Monon	Pyracantha 'Monon'
Pyracantha fortuneana cv. Red Elf	Pyracantha 'Red Elf'
Pyracantha fortuneana cv. Rutgers Hybrid	Pyracantha 'Rutgers Hybrid'
Pyracantha koidzumii	Pyracantha, Formosa Firethorn
Pyracantha koidzumii cv. Victory	Pyracantha 'Victory'
Pyracantha koidzumii cv. Santa Cruz	Pyracantha 'Santa Cruz'
Quercus ilicifolia	Bear Oak
Quercus palustris	Pin Oak
Quercus phellos	Willow Oak
Quercus rubra	Eastern Red Oak
Quercus shumardii†	Shumard Oak†
Ratibida columnifera	Mexican Hat
Ravenea rivularis	Majesty Palm
Rhaphiolepis indica	Indian Hawthorn
Rhaphiolepis indica cv. Charisma	Indian Hawthorn 'Charisma'
Rhaphiolepis indica cv. Enchantress	Indian Hawthorn 'Enchantress'
Rhaphiolepis indica cv. Springtime	Indian Hawthorn 'Springtime'
Rhaphiolepis indica cv. Ballerina	Indian Hawthorn 'Ballerina'
Rhaphiolepis ovata	Yeddo Hawthorne
Rhododendron x cv. Fashion	Azalea 'Fashion'
Rhododendron x cv. Wakaebisu	Azalea 'Wakaebisu'
Rhododendron x cv. George Tabor	Azalea 'George Tabor'
Rhododendron x cv. Delaware Valley White	Azalea 'Delaware Valley White'

Scientific name	Common name
Rhododendron x cv. Girard's Roberta	Azalea 'Girard's Roberta'
Rhododendron x cv. Girard's Crimson	Azalea 'Girard's Crimson'
Rhododendron x cv. Helmut Vogel	Azalea 'Helmut Vogel'
Rhododendron x cv. Hershey Red	Azalea 'Hershey Red'
Rhododendron x cv. Inga	Azalea 'Inga'
Rhododendron occidentale cv. Irene Koster	Azalea 'Irene Koster'
Rhododendron indicum cv. President Clay	Azalea 'President Clay'
Rhododendron x cv. Tradition	Azalea 'Tradition'
Rhododendron forrestii x griersonianum cv. Elizabeth	Rhododendron 'Elizabeth'
Rhododendron calendulaceum	Flame Azalea
Rhododendron calendulaceum cv. Klondyke	Klondyke Azalea
Rhododendron impeditum	Dwarf Purple Rhododendron
Rhododendron x kaempferi cv. Blue Danube	Azalea 'Blue Danube'
Rhododendron maximum	Great Laurel, Rosebay Rhododendron
Rhododendron mucronulatum	Korean Rhododendron
Rhododendron obtusum	Kurume Azalea
Rhododendron x ponticum cv. Chionoides	Rhododendron 'Chionoides'
Rhododendron x cv. Dwarf Scarlet Wonder	Rhododendron 'Dwarf Scarlet Wonder'
Rhododendron racemosum cv. Trilby	Rhododendron 'Trilby'
Rhododendron x cv. Ramapo	Rhododendron 'Ramapo'
Rosa banksiae	Lady Banks' Rose
Rumohra adiantiformis	Leatherleaf Fern
Ruscus hypophyllum	Spineless Butchers Broom
Salix babylonica	Weeping Willow
Santolina virens	Green Lavender Cotton
Sasa pygmaea	Dwarf Bamboo
Scutellaria resinosa	Skull Cap
Sequoia sempervirens	Coast Redwood
Sequoiadendron giganteum	Giant Sequoia
Skimmia japonica	Japanese Skimmia
Skimmia reevesiana	Reeves Skimmia
Solanum rantonnetii	Paraguay Nightshade
Spiraea x bumalda cv. Anthony Waterer†	Spirea 'Anthony Waterer'
Spiraea japonica cv. Magic Carpet	Spirea 'Magic Carpet'
Spiraea japonica cv. Neon Flash	Spirea 'Neon Flash'
Spiraea japonica cv. Neon Flash Spiraea japonica cv. Shirobana	Spirea 'Neon Flash' Spirea 'Shirobana'
Spiraea japonica cv. Neon Flash Spiraea japonica cv. Shirobana Spiraea japonica x vanhouttei	Spirea 'Neon Flash' Spirea 'Shirobana' Vanhoutte Spirea
Spiraea japonica cv. Neon Flash Spiraea japonica cv. Shirobana Spiraea japonica x vanhouttei Streptosolen jamesonii	Spirea 'Neon Flash' Spirea 'Shirobana' Vanhoutte Spirea Marmalade Bush
Spiraea japonica cv. Neon Flash Spiraea japonica cv. Shirobana Spiraea japonica x vanhouttei Streptosolen jamesonii Swietenia mahogani	Spirea 'Neon Flash' Spirea 'Shirobana' Vanhoutte Spirea Marmalade Bush Mahogany
Spiraea japonica cv. Neon Flash Spiraea japonica cv. Shirobana Spiraea japonica x vanhouttei Streptosolen jamesonii Swietenia mahogani Syringa vulgaris	Spirea 'Neon Flash' Spirea 'Shirobana' Vanhoutte Spirea Marmalade Bush Mahogany Common Lilac
Spiraea japonica cv. Neon Flash Spiraea japonica cv. Shirobana Spiraea japonica x vanhouttei Streptosolen jamesonii Swietenia mahogani Syringa vulgaris Syzygium paniculatum	Spirea 'Neon Flash' Spirea 'Shirobana' Vanhoutte Spirea Marmalade Bush Mahogany Common Lilac Magenta Cherry
Spiraea japonica cv. Neon Flash Spiraea japonica cv. Shirobana Spiraea japonica x vanhouttei Streptosolen jamesonii Swietenia mahogani Syringa vulgaris Syzygium paniculatum Taxus cuspidata	Spirea 'Neon Flash' Spirea 'Shirobana' Vanhoutte Spirea Marmalade Bush Mahogany Common Lilac Magenta Cherry Japanese Yew

\*\*Not for use on container grown plants.

Table 12. The Plants Listed in this Table are Not Likely to be Injured by Gemini 3.7 SC at the 1 oz./1000 sq. ft. (43.5 oz./acre) Rate

Scientific name	Common name
Achillea millefolium cv. Paprika	Yarrow 'Paprika'
Achillea millefolium cv. Saucy Seduction	Yarrow 'Saucy Seduction'
Agapanthus africanus	Lily of the Nile
Aster novi-belgii	New York Aster
Buddleia davidii cv. Royal Red	Butterfly Bush 'Royal Red'
Buxus x cv. Green Velvet	Boxwood 'Green Velvet'
Catharanthus roseus	Madagascar Periwinkle
Euonymus fortunei cv. Blondy	Wintercreeper 'Blondy'
Euonymus fortunei cv. Emerald Gaiety	Wintercreeper 'Emerald Gaiety'
Gardenia jasminoides	Gardenia
Gardenia jasminoides cv. Mystery	Gardenia 'Mystery'
Hibiscus syriacus cv. Woodbridge	Rose of Sharon 'Woodbridge'
Juniperus squamata cv. Blue Star	Juniper 'Blue Star'
Lavender angustifolia cv. Munstead†	Lavender 'Munstead'†
Ligustrum x vicaryi	Golden Privet
Viburnum opulus	Snowball Viburnum
Weigelia florida cv. Minuet	Weigela 'Minuet'

<sup>†</sup> Not for use in California

Table 13. Do not use this product for weed control in the following ornamental plant species:

Scientific name	Common name
<i>Ajuga</i> spp.	Bugleweed or Ajuga
Brassica spp.	Mustard
Echinacea purpurea	Purple Coneflower
Euonymus alatus 'Compacta'	Dwarf Burning Bush
Euphorbia spp.	Spurge
Hydrangea spp.	Hydrangea
Iberis spp.	Candytuft
Juniperus horizontalis 'Prince of Wales'	'Prince of Wales' Juniper
Melaleuca quinquenervia	Cajeput Tree
Rhododendron caroliniaum	Carolina Rhododendron
Rhododendron catawbiense 'Roseum elegans'	'Roseum Elegans' Rhododendron
Sedum spp.	Stonecrop
Yucca recurvifolia	Green Yucca

### **VEGETATION MANAGEMENT**

### **Product Information**

Apply Gemini 3.7 SC to soil surfaces for preemergence control of many grass and broadleaf weeds in non-crop areas including ornamentals (does not include container or field grown ornamentals) or surrounding non-crop areas such as managed rights-of-way for transportation systems and utilities (including roadways, roadsides, railways, and equipment yards) and facilities including substations, tank farms, pumping stations, parking and storage areas, and non-grazed fence rows. The best weed control occurs when the product is activated in the soil by 0.5 inch of irrigation or rainfall before weed seeds germinate and within 14 days after application.

#### **Timing and Method of Application**

Gemini 3.7 SC is a preemergence herbicide only and will not control emerged grass or broadleaf weeds. It works best when applied to soil that is free of clods, weeds and debris and is activated by at least 0.5 inches of irrigation or rainfall or shallow incorporation to a depth of 1 to 2 inches. Weed control is improved if Gemini 3.7 SC is activated in the soil before weed seeds germinate and within 14 days after application. Apply Gemini 3.7 SC to newly-transplanted and established ornamentals as a broadcast or over- the-top spray.

### **Plant Sensitivity**

Direct application of Gemini 3.7 SC to rapidly growing tissue or buds can injure desirable plants. In the spring when buds are rapidly growing and expanding, over-the-top application of Gemini 3.7 SC can injure new growth of desirable plants, however, these effects are temporary. To reduce the possibility of injury at this time, wait to apply Gemini 3.7 SC over the top of newly emerged vegetation until it has hardened off, unless your experience indicates that the ornamental plant will not be injured by the over-the-top application. After application, immediately apply overhead irrigation to the foliage to wash Gemini 3.7 SC from plant surfaces onto soil (watering the foliage of plants before application can improve the washing process).

#### **Tank Mixtures for Use in Vegetation Management**

Tank mix Gemini 3.7 SC with other registered herbicides listed on this label to provide a broader spectrum of weed control or to control emerged weeds. Tank mixes with Gemini 3.7 SC are for use only in states where the tank-mix partner(s), application site and intended use pattern are registered.

Follow the label directions of the tank-mix partner(s) for application rates, timing, weeds controlled, listed ornamentals, and specific use precautions and/or restrictions. Before combining a tank-mix partner in the spray tank, test for compatibility as described on this label.

Table 14. Tank-Mix Partners for Gemini 3.7 SC Use in Vegetation Management

	Product	Precautions/Instructions	
	Galigan 2E <sup>®</sup> (use on conifers only)	<ul> <li>Mix with Gemini 3.7 SC for postemergence con- trol of certain broadleaf weeds including malva and filaree.</li> </ul>	
	Quali-Pro Isoxaben 75 WG, Princep® MANA Parallel	See product labels for weed spectrum and listed ornamentals.	
	Glyphogan <sup>®</sup> (or other glyphosate-based products) and Finale <sup>®</sup>	These nonselective tank mix herbicides control many emerged annual broadleaves and grasses.  Take extreme care to prevent tank mixtures with these partner products from contacting the foliage and stems of turfgrass, trees, shrubs, or other desirable vegetation because desirable vegetation might be severely injured or killed. Apply these tank mixtures as a directed spray and use a shield to prevent spray from contacting foliage of desirable plants.  Following instructions on the tank-mix	
		partner's label, delay irrigation of the treated area to allow time for the herbicide to be absorbed by weed foliage.	

#### Sensitivity of Ornamental Species - Vegetation Management

Gemini 3.7 SC will not likely harm the trees, shrubs, vines and flowers listed above in **Table 11**. Gemini 3.7 SC can be applied over the top of the listed species.

When plants are under stress (such as heat, drought, or frost damage), some cultivars of listed plants may be sensitive to Gemini 3.7 SC.

#### **VEGETATION MANAGEMENT - NON-CROP AREAS**

#### **Product Information**

Apply Gemini 3.7 SC to soil surfaces for preemergence control of many grass and broadleaf weeds in non-crop areas including ornamentals (does not include container or field grown ornamentals) and established perennials on or surrounding non-crop areas as directed in **Table 15**. The best weed control occurs when the product is activated in the soil by 0.5 inches of irrigation or rainfall before weed seeds germinate and within 14 days after application.

Table 15. Amount of Gemini 3.7 SC to Apply to Non-Crop Areas for Control of Weeds Listed in Table 2.

Site	Application Rate	Timing	Comments/ Instructions
Non-crop areas, including ornamentals, on or surrounding managed rights-of-way for transportation systems and utilities (including roadways, roadsides, railways, and equipment yards); facilities including substations, tank farms, pumping stations, parking and storage areas, and nongrazed fence rows.	38 – 87 fl. oz./acre or 0.9- 2.0 fl.oz./1,000 sq. ft.	Before weed seeds germinate	Use higher rate range for longer control.  More than one application per year is permitted, but do not apply more than 87 fl. oz./acre (2.5 lbs. active/acre) per year.  Sequential applications must be separated by a minimum of 60 days.

#### **Tank Mixtures for Use in Non-Crop Areas**

Tank mix Gemini 3.7 SC with other registered herbicides listed on this label to provide a broader spectrum of weed control or to control emerged weeds. Tank mixes with Gemini 3.7 SC are for use only in states where the tank-mix partner(s), application site and intended use pattern are registered.

Follow the label directions of the tank-mix partner(s) for application rates, timing, weeds controlled, listed ornamentals, and specific use precautions and/or restrictions. Before combining a tank-mix partner in the spray tank, test for compatibility as described on this label. See the **Compatibility Testing** section of this label.

For non-crop areas, tank mix Gemini 3.7 SC with Glyphogan® (or other glyphosate-based products), Parazone 3SL® (or other paraquat-based products), Diuron 4L (or other diuron-based products), Oryzalin 4AS (or other oryzalin based products), Reward®, Predict®, Princep®, Vanquish®, Finale®, Garlon®, Krovar® I and II, Oust®, Arsenal®, Spike® and Telar®.

#### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal or cleaning of equipment.

**PESTICIDE STORAGE:** Store in original container in dry area. Do not store in a manner where cross-contamination with other pesticides, fertilizers, food or feed could occur. If spilled during storage or handling, absorb with sand or other inert material and dispose of absorbent in accordance with the Pesticide Disposal instructions listed below.

**PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be used according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

#### **CONTAINER HANDLING:**

**Non-refillable Container:** Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. If recycling is not available, puncture and dispose of in a sanitary landfill or by incineration or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

# DISCLAIMER AND LIMITATION OF LIABILITY IMPORTANT NOTICE FROM EVERRIS NA INC ("EVERRIS"). PLEASE READ BEFORE USE.

To the extent consistent with applicable law, user or buyer accepts the conditions, disclaimer of warranties and limitations of liability. Read the entire directions for use, conditions of warranties and limitations of liability before using this product. If terms are not acceptable, return the unopened product container at once for full refund.

CONDITIONS: The directions for use of this product are believed to be adequate and the user or buyer must always follow the label directions carefully and exercise judgment and caution when using this product under their growing conditions. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness, unsatisfactory or substandard results or other unintended consequences may result because of such factors as weather conditions, presence or absence of other materials, or the manner of use or application, all of which are beyond the control of Everris. All such risks shall be assumed by the user or buyer.

WARRANTY: This product corresponds to all claims and descriptions set forth on the label and is reasonably fit for the purposes set forth in the directions for use on the label when used in accordance with those directions. This warranty is subject to the conditions and limitations stated herein. Evernis recognizes that the rights and remedies of the user or buyer are subject to the provisions of the applicable law, but makes no other warranties or representations, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond the statements made on this label. No agent of Everris is authorized to make any warranties beyond those contained herein or to modify the warranties contained therein. Subject to the user's or buyer's rights and remedies under the applicable law, Everris disclaims any liability whatsoever for special, incidental or consequential damages resulting from the use or handling of this product.

LIMITATIONS OF LIABILITY: Subject to the user's or buyer's rights and remedies under the applicable law, the exclusive remedy of the user or buyer and the liability of Evernis or its affiliates, for any and all losses, injuries or damages resulting from the use or handling of this product, whether in contract, warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price paid by the user or Buyer for the quantity of this product involved or, at Evernis' election, the replacement of the product. To the extent consistent with applicable law, Evernis must have prompt notice of any claim so that a timely investigation of buyer's or user's claim can be made. Buyer and all users shall promptly notify Evernis of any claims, whether based on contract, negligence, strict liability, other tort or otherwise or be barred from any remedy.
