

Osmocote® Blend

17-5-11

SKU - A90180
Packaging - 50 lb

This blend is made of 100% resin coated N-P-K with an additional charge of large granular Micromax®. Using this Osmocote® Blend allows growers and media blenders to use their second bin on their mix line for something other than Micromax®. The resin coated, homogenous N-P-K cores mix throughout the root zone for consistent and reliable feeding

Target Crops/ Special Uses

Osmocote Blend 17-5-11 is recommended for use in greenhouse, nursery, field grown and landscape environments. It is generally blended into the growing media, but it can be topdressed in the pot, subdressed or dibbled. It is recommended that the pot is thoroughly watered before or directly after planting to release the minor nutrients from the Micromax granules and disperse it into the media. This product is widely used as a single source of nutrients in both greenhouses and nursery container grown plants. Its balanced offering of nutrients makes it a great choice for growers that are looking for a more economical option to our top of the line product, Osmocote® Plus. The most common uses are as a base feed incorporated with water soluble fertilizer programs in heavy feeding plants like petunia baskets

PRODUCT ADVANTAGES

- Safe, reliable formulation recommended for Greenhouse, Nursery and Landscape use.
- Consistent feeding of even the most demanding plants.
- Can be used in conjunction with water soluble programs or as an all in one growing solution
- Contains Homogenous N-P-K resin coated controlled release fertilizer blended with Micromax micronutrients.

APPLICATION RATES

The application rates listed are intended as a guideline in developing a fertilization program. These rates may or may not apply to your area or growing conditions. It is the responsibility of the grower to determine the appropriate rate. Your rate may be higher or lower than suggested based on your growing conditions. Follow label instructions and use care when handling all fertilizer products.

FOR PROFESSIONAL USE ONLY

ICL Specialty Fertilizers recommends a product trial prior to adopting a new fertilizer program. Product selection and application rate should be based on individual grower practice. The following are general recommendations only.
