

MAXLAWN Fall Lawn Food Winterizer 22-0-10 provides essential nutrients to promote lush turf, increased resistance to disease, and promotes healthier turf during winter dormancy allowing for a quicker spring green up. This product will also improve the color, density and uniformity to the turf plus provide a long lasting feeding. Good cultural practices such as mowing and watering will also aid in keeping your turf vigorous and beautiful.

DIRECTIONS FOR USE:
Apply evenly to turf at a rate of 3.2 pounds per 1,000 sq ft using a properly calibrated broadcast or drop spreader. This fertilizer may be applied to dry or wet turf and a light watering after application will help activate the product sooner. People and pets may enjoy the treated area once the turf has dried. Repeat applications can be made in 6-8 weeks. Avoid application in moderate to high wind conditions to prevent drift and uneven distribution of fertilizer.

Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rains are expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk, or street back onto your lawn.

COVERAGE
To determine the square footage of the application area, multiply the length of the lawn by its width. This equals your total square footage. Deduct any non-lawn areas (driveway, sidewalk, house, etc.) One bag covers 5,000 sq. ft. or 3.2 pounds per 1,000 sq. ft.

ALLOW 6 WEEKS BETWEEN APPLICATIONS

MAXLAWN LAWNCARE PROGRAM

- CRABGRASS PREVENTER (EARLY SPRING)
- WEED & FEED (LATE SPRING/EARLY SUMMER)
- LAWN FOOD (SUMMER OR ANYTIME)

Earthway EV-N-Spread	9
Precision	1.5
Red Devil	1.5
Scotts AccuGreen 1000	6
Scotts AccuGreen 2000	6
Scotts AccuGreen 3000	6
Scotts EvenGreen	7.5

For Drop Spreaders: First apply two strips at ends. Then apply product along the length of the lawn, overlapping very slightly and shutting off spreader when turning.

CALIBRATING SPREADER: Adjust spreader to apply 1 lb. of product per 310 sq.ft.

IMPORTANT: Follow directions as overapplication may cause damage to your lawn. The condition of your spreader and the speed at which you spread may cause differences. For drop spreaders, overlap the wheel tracks to insure complete coverage. A broadcast spreader should slightly overlap swathe to insure proper coverage. Close spreader openings when filling, turning, or stopping. Do not apply fertilizer by hand. Keep this product off sidewalks, patios, driveways, etc. This fertilizer contains iron which will stain concrete and painted surfaces. If it comes in contact with concrete surface, sweep off immediately before flushing with water. If concrete is wet when contact occurs, staining may be impossible to prevent. Be careful when using rotary spreaders which scatter fertilizer beyond lawn edge and onto concrete. It is not recommended to apply any fertilizer on extremely dry lawns when the weather is unusually hot.
