

DUOCIDE™

NEXT-LEVEL GRUB CONTROL, ABOVE AND BELOW.

✓ WHITE GRUBS ✓ EUROPEAN CRANE FLY ✓ CHINCH BUGS ✓ SOD WEBWORM

WHAT SETS DUOCIDE APART?

Unlike most insecticide products on the market today, which force applicators to choose between controlling surface OR sub-surface insects, DuoCide represents the only solution designed to suppress insects both above AND below the surface.

Featuring carbaryl AND bifenthrin, DuoCide is a broad-spectrum insecticide designed for the preventative and curative treatment of feeding insects, including white grubs, European crane fly, chinch bugs, sod webworm, and many more!

Unlike other insecticide products featuring corncob carriers, which take much longer to breakdown, DuoCide is formulated on The Andersons' DGPro® dispersing granule carrier, which immediately breaks down particles upon contact with water, more quickly dispersing the insecticide.
