

1 Prepare Light Fixtures

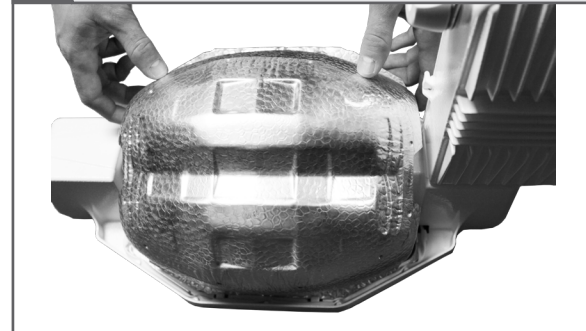

- Arrange boxed light fixtures on floor in specified mounting locations; remove fixtures from boxes.

2 Attach Mounting Brackets

- Turn bracket knobs on fixture counter-clockwise to loosen.
- Slide wire bracket beneath the knobs.
- Rotate knobs clockwise to tighten, securing bracket in place.

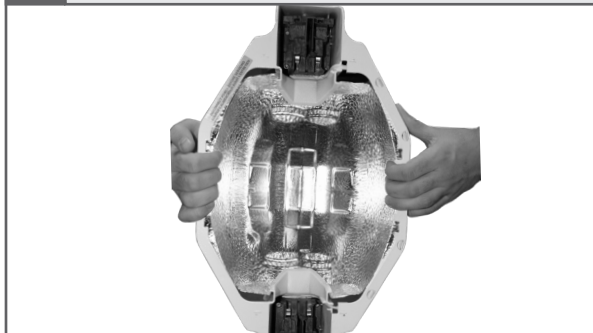

3 Insert Reflector into Collar

- Slide reflector into collar at an angle, so that outer rim is inserted beneath the collar tabs.

(Note: Wear cotton gloves or wash hands thoroughly with soap & water to remove any grime/oils before handling reflector.)

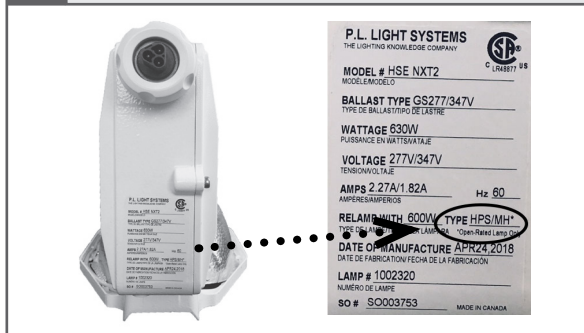

4 Adjust and Secure Reflector

- Using both hands, adjust the reflector from the inside, by gently pressing outwards until the outer rim fits securely beneath the collar tabs on all sides.

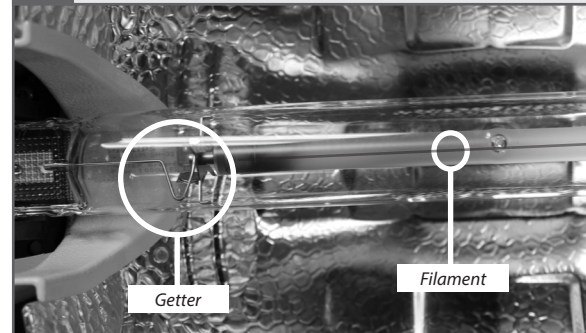

(Note: Wear cotton gloves or wash hands thoroughly with soap & water to remove any grime/oils before handling reflector.)

! IMPORTANT

- Always check the fixture label prior to installing a Metal Halide (MH) lamp to ensure your fixture is compatible.
- Always ensure that the lamp is “open-rated” when installing a MH lamp.

5A Install Lamp

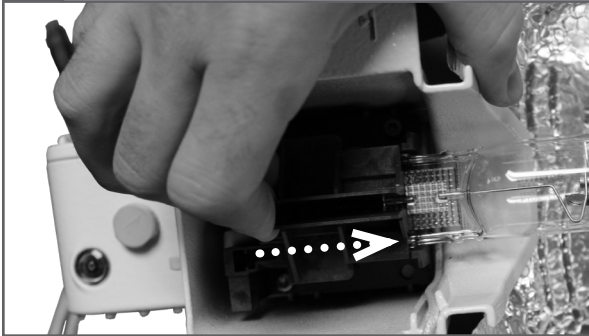

- Slide the plastic locks outwards.
- Install lamp, ensuring side with “getter” is closest to electronics compartment. If lamp is HPS, ensure burner filament is on top (away from reflector).

(Note: Always wear cotton gloves when handling double-ended lamps.)

ATTENTION: Install in accordance with national and local building and electrical codes.

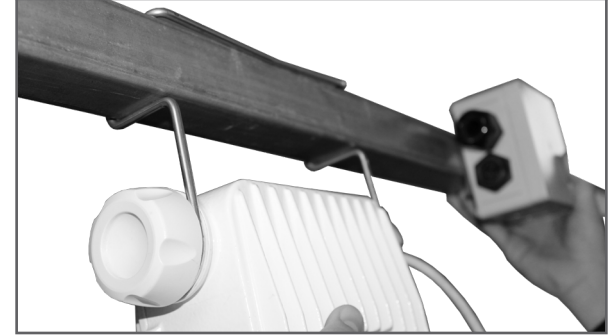

**5B IMPORTANT**

- Slide locks back in place to secure lamp.
- Ensure that the sliding mechanism has fully closed against the stop, as loose connections may cause arcing—potentially creating a fire risk and/or voiding warranties.

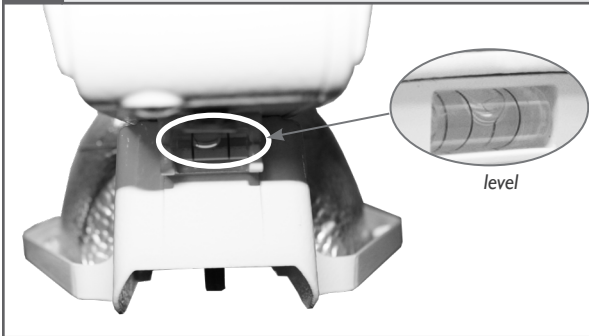

6 Install Connector Box (Wieland Option ONLY)

Note: This step is for Wieland Connector power cord option **ONLY**.

- Install Wieland connector box / receptacle (sold separately) in suitable locations.

7 Mount Fixture

- Raise fixture to ceiling and slide mounting bracket over the track/truss; ensuring fixture is securely in place.

8 Level Fixture

- Use integrated level on back of the housing to adjust the light fixture. Fixture is level when spirit level bubble is centered.

9 Complete Electrical Connection

- Connect power cord from fixture to power supply.

ATTENTION: Install in accordance with national and local building and electrical codes.
